ARIZONA"S FIVE-YEAR PROGRAM

# AIRPORTS HIGHWAY

FY 1999-03

### 1999 - 2003

# Transportation Facilities Construction Program

The Five-Year Construction Program is basically a budget spelling out what Arizona expects to receive in funds from various sources and how it proposes to spend them project by project.

Each year the program is evaluated and updated through a comprehensive review process. Public hearings are held to help determine the final program. All citizens are invited to attend the hearings and present any questions or comments on the program to the State Transportation Board.

Our highway and airport construction programs will result in a better quality of life for all citizens. The improvements in this document will help us face the challenges and the growth that tomorrow will bring.

## Priority Programming Process

or over a decade, the Arizona Department of Transportation has developed a **Five-Year Transportation Facilities Construction Program** for highways and airports under the "priority programming law." The law sets guidelines which the department follows in prioritizing projects for the program. This publication outlines the key features of the programming process and identifies the projects selected for the fiscal years 1999 through 2003. It will help to explain how the projects are prioritized and how Arizona citizens can have a say in what is selected.

### The Goals

## Meet Transportation Needs of the Citizens

The primary goal at ADOT is to provide a transportation system; together with the means of revenue collection, licensing and safety programs, which meet the needs of the citizens of Arizona.

### Set Objective Priorities

The "priority programming law" in Arizona Revised Statutes (A.R.S. 28-111) establishes a process and guidelines used by the State Transportation Board in prioritizing road improvements and projects. This law is designed to establish a program that is

responsive to citizens' needs throughout the state while remaining secure from special interest pressure. The types of criteria considered in preparing the program include:

- Safety factors
- User benefits
- Continuity of improvements
- Social factors
- Land use
- Aesthetic factors
- Conservation factors
- Life expectancy
- Recreational factors

- Availability of state and federal funds
- Other relevent criteria

### The Means

# Five-Year Transportation Facilities Costruction Program

ADOT's efforts to construct Arizona's transportation facilities are focused on the Five-Year Transportation Facilities Construction Program. The program is updated annually and must be adopted by the State Transportation Board by June 30

of each year. Highways and airports are covered by seperate elements.

### The Process

### **Board Sets Guiding Policies**

The statutory power to prioritize individual airport and highway projects is placed on the State Transportation Board, a seven member panel appointed by the governor. Members of the panel serve six-year terms and represent different geographical regions of the state. This panel not only presides over the establishment of priorities, but also awards all highway contracts.

The Transportation Board is assisted in setting priorities by a committee appointed by the ADOT director. The committee, known as the Priority Planning Committee, consists of the deputy director as chairperson, representatives from the Intermodal, Operations, Aeronautics, Motor Vehicle and Administrative Service Divisions. They are guided by a number of policies which are established by the board. The current policies address the following commitments:

- To the state highway system
- To take full advantage of federal aid
- To value engineering

- Program categories
- Criteria for prioritizing projects
- Joint sponsorship criteria
- Interstate funding
- Controlled access systems
- Transportation systems management
- Non-interstate system rest areas
- Non-interstate system landscaping
- Interstate system rest areas

Board policies are reviewed periodically and updated as needed to meet everchanging transportation needs. A summary of the board policies is available from the ADOT Transportation Planning Group.

### Highway Projects Identified

The highway construction program is a product of input from citizens, local governments, planning organizations, chambers of commerce, the business community and ADOT professionals. All of these parties are involved with our transportation system in one way or another.

The ADOT planners and engineers rely on a number of technical measures to identify

highway needs. These measures include the ADOT pavement management system, accident studies, route corridor studies and the State Highway Plan.

Highway improvement needs identified through public input and technical studies typically far exceed the revenues available over the Five-Year Construction Program. This leads to the next and most difficult phase of the programming process -- prioritizing highway improvement needs.

### Highway Projects Prioritized

There are many different ways to prioritize a project. One key criteria used by ADOT to prioritize projects on existing highways is a technical measure called the sufficiency rating system. This system is an objective tool that incorporates a number of roadway characteristics, including pavement conditions, accidents and traffic volumes.

Other criteria are also used to prioritize projects. Among these are the significance of the route, route continuity, cost effectiveness measured by the project cost per motorist served and recommendations of our experts in the field, the district engineers.

Criteria are considered in the ranking of candidate projects for each program category. The highest ranked projects are then considered for inclusion in the construction program to the extent that funding is available.

For projects already in the program, necessary engineering resources are allocated to meet target construction dates. However, unanticipated problem areas or events outside the department's control may require program adjustments. These changes are made on the basis of revised estimates of project development time.

The MAG Freeway System project priorities are established through a two-step process. First, the MAG Regional Council established and approved the system priorities by route segment in 1986 and updated them in 1990. The second step establishes priorities for specific projects. In setting these priorities, ADOT is guided by the system priorities established in step one. Other criteria include traffic volume, system connectivity and cost per lane-mile.

The Maricopa County section of this report contains a life-cycle program for construction of the controlled-access system in Maricopa County (MAG Proposition 300 Freeways). The concept of a life-cycle program refers to a programming approach which includes not only the usual five-year programming period.

but also recognizes the need to allocate funds through the full life of major funding sources. As a result, the MAG Life-Cycle Freeways Program covers the full period of the Maricopa County one-half cent transportation excise tax and extends through the fiscal year 2005-2006.

### **Aviation Needs Identified**

Aviation needs are identified in a fashion similar to the highway process. There are however, a number of factors and technical measures that are unique to aviation planning efforts. With the exception of the Grand Canyon National Park Airport, airport facilities are not owned and operated by ADOT. As a result, heavy reliance is placed on the airport managers throughout the state to identify needed airport improvements. Projects are often drawn from master plans prepared for individual airports and from the National Airport System Plan.

The ADOT Aeronautic Division assists the various airports in identifying needs through the development of a State Aviation Needs Study, the Regional Airport Systems Plans and special aviation studies that may be conducted during the planning period. In addition, ADOT maintains an airport priority rating system that draws

from an extensive database of airport conditions.

Airport needs sometimes exceed available revenues, making it essential to prioritize projects.

### **Aviation Needs Prioritized**

Aviation needs are prioritized based on the Airport Priority System. Included in this system are ADOT board policies, importance of the project to the airport, importance of the airport to the citizens and provisions from the priority programming law (A.R.S. 28-6951).

The airport project rating system is a weighted scale. Points are awarded according to the following factors:

- Project is on main runway
- New construction
- W Number of aircraft on wait list
- Annual passengers enplaned for scheduled air service
- Annual aircraft operations
- Annual aircraft operations to capacity ratio

The total points awarded to each airport are used to rank all project requests. The highest ranked projects are then considered according to funding availability.

## Tentative Program is Presented to the Board

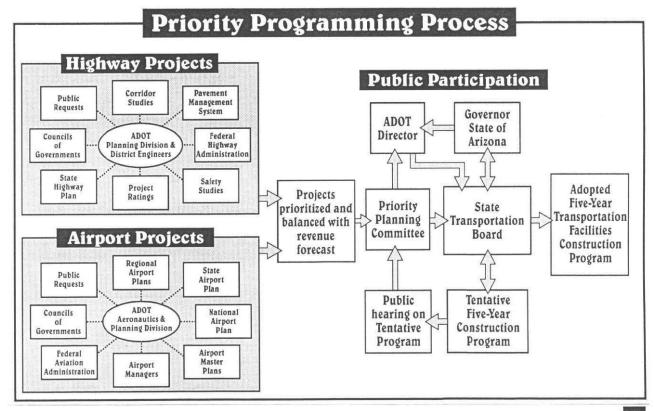

Once all highway and airport project requests have been prioritized and matched with available funding, the Priority Programming Committee presents a Tentative Update of the Five-Year Program to the State Transportation Board. The board authorizes release of the tentative program for review by the public.

### Public Hearings on Your Views

After release by the board, the tentative program is distributed widely throughout the state to local elected officials, transportation agencies and other interested parties. Public hearings are then conducted to obtain input from anyone who wishes to comment on the program.

Historically, only one public hearing on the program was held each year in Phoenix. In an effort to gain wider participation and make it more convenient for the citizens of Arizona to convey their comments to the board, hearings are now scheduled in other areas of the state. Hearing locations are

established in January of each year when the Transportation Board sets its annual meeting schedule. In addition, written comments are accepted and all comments, written or verbal, are considered before the program is adopted in final form.

### The Budget

### **Highway Funds**

Primary funding sources for the Five-Year Highway Construction Program are derived from federal highway trust funds, transportation excise tax monies and state highway user revenues. Bond proceeds are used as needed to attain a balance between critical construction requirements and revenue availability. Funding for the FY 1999-2003 Five-Year Highway Construction Program totals \$3.2 billion.

The programming of both state and federal monies is guided by numerous stipulations regarding the use of monies. The end result is a categorization of projects by program funding. The major categories are:

W New construction and reconstruction

Pavement preservation

Other (includes safety, research, mapping, minor projects.)

Over the five-year program period, the Maricopa County urban freeway system will receive nearly \$933 million of the expected funds. The primary source of this program is the transportation excise tax assessed by voters in Maricopa County. Another portion of this program will be financed by 15% controlled access funds

and federal funds dedicated to the MAG area.

| FY 1999 - 2003<br>(In millions of dollars) |           |  |  |  |  |  |  |
|--|-----------|--|--|--|--|--|--|
| Construction                               | \$ 1, 129 |  |  |  |  |  |  |
| Pavement Preservation                      | 532       |  |  |  |  |  |  |
| Other Projects                             | 473       |  |  |  |  |  |  |
| Total Statewide Program                    | \$2,221   |  |  |  |  |  |  |
| MAG Freeway System                         | 933       |  |  |  |  |  |  |
| —<br>Total Highway Program                 | \$3,155   |  |  |  |  |  |  |

### **Aviation Funds**

The Five-Year Aviation Program totals \$320 million. Federal, state and local funds are the primary sources for financing airport construction projects. Federal monies are derived mainly from taxes on airline tickets

and are distributed by the Federal Aviation Administration to local airports through the National Airport Improvement Act. State funds come mainly from flight property tax, lieu taxes on aircraft and aviation fuel taxes.

Federal grant monies will finance \$208 million of the program while the state share is around \$92.4 million. Local sponsors contribute another \$19.6 million.

| Airport<br>Development P |         |
|--------------------------|---------|
| FY 1999 - 2              |         |
| (In millions of doll     | ars)    |
| Commercial Service/      |         |
| Reliever Airports        | \$ 71.1 |
| Public Airports          | 21.3    |
| Total State Funds        | \$ 92.4 |

### The Schedule

A.R.S. 28-1825 identifies a number of statutory deadlines that must be met. The statutory dates are:

- On or before the first Monday in May, publish a public hearing notice.
- On or before the third Monday in May, a public hearing will be held.

On or before the first Monday in August, publish a public document summarizing the Five-Year Program.

To meet these required deadlines, work on the program update must begin in the late summer or early fall of each year. The following chart identifies a typical schedule for the program update.

### **Questions or Comments**

If you have any questions about how you can become involved in the ADOT Priority Programming Process, write or call:

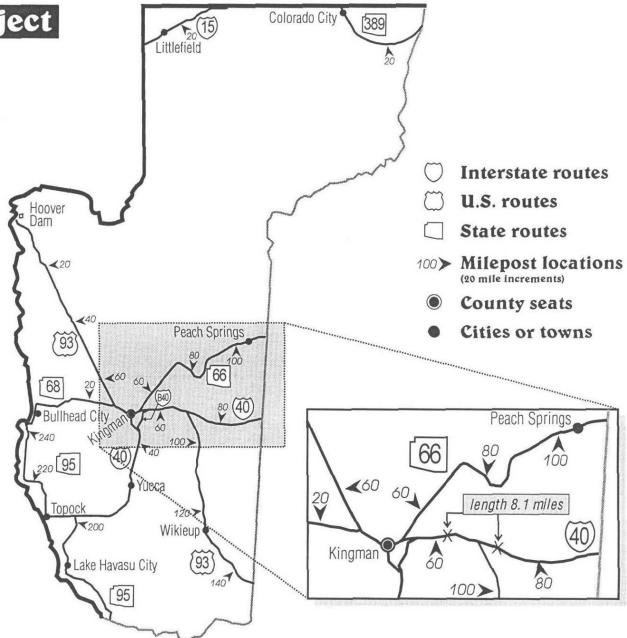

Jay Klagge, director ADOT Transportation Planning Group 206 S. 17th Ave. Phoenix, AZ 85007 Phone (602) 255-7431

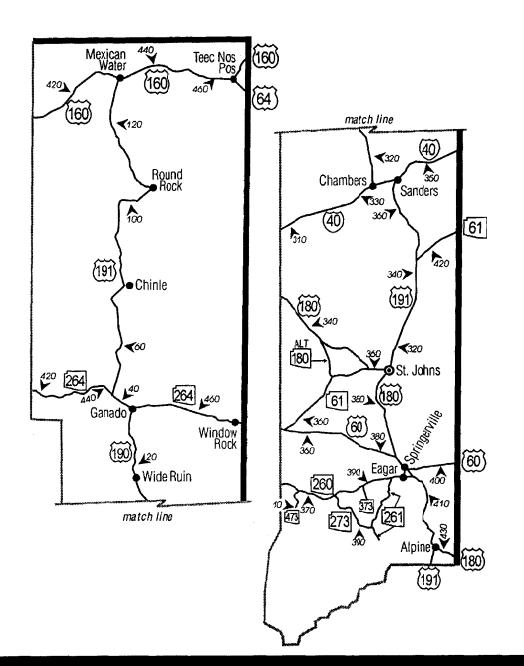

Gary Adams, director ADOT Aeronautics Division 1833 W. Buchanan St. Phoenix, AZ 85007 Phone (602) 255-7961

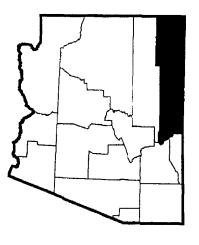

- All projects are identified by state route number, beginning milepost location, length and fiscal year.
- As an example, a project in Mohave County, located on I-40, beginning at milepost 63.0 for a length of 8.1 miles.
- Look in the Mohave County section for I-40. Find the closest milepost to this point by approximating the location of milepost 63.0, then extend east 8.1 miles. This will give you the project begin and end points.

# AIRPORT DEVELOPMENT

## 1999 - 2003

## Airport Facilities Construction Program

he budgeting process for the Five-Year Airport Construction Program parallels the highway program effort with the dual objective of maximizing effective use of state dollars for airport improvements, while attracting maximum federal aviation funds.

Federal, state and local funds are the primary financial sources for funding airport construction projects. Federal monies are derived mainly from taxes on airline tickets and are distributed by the Federal Aviation Administration to local airports through the National Airport Improvement Program. State funds come mainly from flight property tax, lieu taxes on aircraft and aviation fuel taxes.

This program reflects legislative changes to the flight property tax, which have impacted the availability of future state aviation funding, and includes the conversion of the management of the State Aviation Fund from an "obligation" basis to a "cash" management basis.

The state's share of the five-year program is estimated at \$92.4 million. This represents a 12% decrease in available funding resulting from the legislative changes. Local sponsors will contribute another \$19.6 million. The maximum state grant does not exceed 10% of the net available for construction. The maximum state/local grant for Fiscal Year 1999 is \$994,000.

This five year investment will finance 661 projects with approximately \$71.1 million allocated to commercial service and reliever airports and approximately \$21.3 million allocated to public airports.

In the budgeting process, project funds are allocated to publicly owned airports in two categories and three sub-programs:

## **Program Categories**

- Projects utilizing federal, state and local funds
- Projects utilizing state and local funds only

## Sub-program Categories

- ✓ Maintenance
- Safety & capacity enhancements
- Environmental, planning & land acquisition

The Grand Canyon National Park Airport, because it is State owned, must provide its local share of the projects from the State Aviation Fund. ADOT is in the process of turning the Grand Canyon National Park Airport over to an airport authority in which the new operator will become responsible for the local sponsor share of all federal and state grants. The Transportation Board approves all allocations, including the local share. The airport is operated on a "breakeven basis," with revenues derived from the commercial users paying for the operation and local share of matching capital expenses.

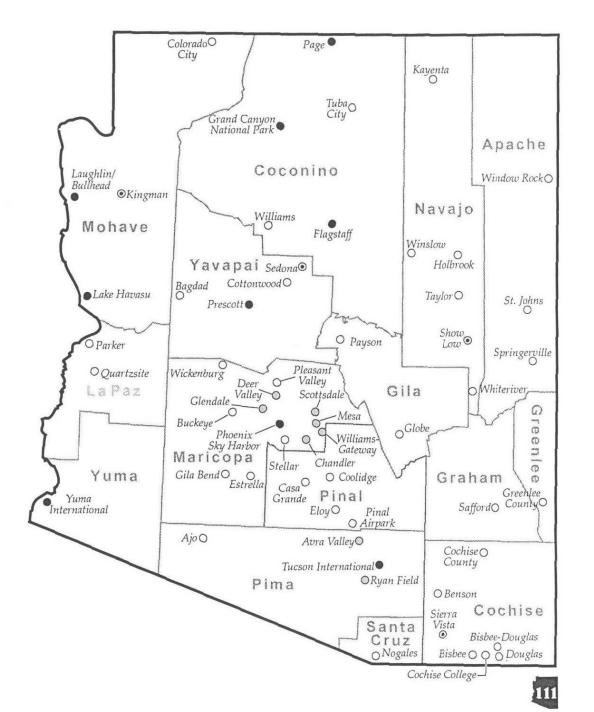

The five-year aviation program contributes significantly toward the satisfaction of system user needs by cooperative coordination of project development throughout the planning, programming, engineering and construction phases.

## **Primary Airport System**

## **Airport Classifications**

- Primary Commercial Service Airports
- Other Commercial Service Airports
- Reliever Airports
- Public Use Airports

## Secondary Airport System

## Airport Ownership

- O Public
- Private
- Native American

#### Safety and Capacity Enhancement

#### 1999 -2003 Five-Year Program Summary

|                         | State      | Local      | <u>Federal</u> | Total         |
|-------------------------|------------|------------|----------------|---------------|
| FY 1999 Total           | 25,337,876 | 4,747,908  | 47,915,487     | \$78,000,871  |
| FY 2000 Total           | 21,154,902 | 5,496,771  | 55,534,577     | \$82,186,249  |
| FY 2001 Total           | 17,017,985 | 3,220,204  | 35,000,042     | \$55,238,231  |
| FY 2002 Total           | 16,072,031 | 3,192,941  | 35,000,042     | \$54,265,014  |
| FY 2003 Total_          | 12,803,420 | 2,932,580  | 35,000,042     | \$50,736,042  |
|                         |            |            |                |               |
| 1999 - 2003 Grand Total | 92,386,214 | 19,590,404 | 208,450,190    | \$320,426,407 |

# Glossary of Terms

# Highway Program

Archaeological -- Consists of searching for archaeological artifacts before constructing a roadway

Bureau -- Bureau of Reclamation

**Design** -- Consists of developing plans for future construction of roadway

Erosion control -- Protecting slopes along roadways by using landscaping

**Grade drain and structures --** Rebuilding of bridge structures

Intersection improvement -- Consists of improving intersection by widening lanes, adding turn lanes, crosswalks, etc.

Mill -- Removing deteriorated surface of the roadway

Reconstruct and pave -- Replace asphalt

Rehabilitate rest area -- Upgrade and remodel rest area facilities

Right-of-way -- Acquiring/purchasing of land on which to build a roadway

Rock scaling -- Sealing mountains along roadway to prevent rock slides

**Rubber planking --** Replacing railroad ties at railroad crossings

**Seal coat --** Chip seal or coating the roadway to prolong its use life

**Signing --** Placing informational and directional signs along roadway

State -- Non-federal aid

**Utilities** -- Moving utilities in order to build roadway

# **Airport Program**

ALP - Airport Layout Plan

ARFF -- Aircraft Rescue and Fire Fighting

**ASOS** -- Automated Surface Observation System

**AWOS** -- Automated Weather Observation System

**CCTV** -- Closed Circuit Television (security system)

EA -- Environmental Assessment

FAA -- Federal Aviation Administration

FBO -- Fixed Base Operator

**GPS** -- Global Positioning System

GVGI -- General Visual Glideslope Indicator

HIRL -- High Intensity Runway Lights

ILS -- Instrument Landing System

MALSR -- Medium Intensity Approach Light System with Runway Alignment Indicator Lights

MIRL -- Medium Intensity Runway Lights

MITL -- Medium Intensity Taxiway Lights NAVAID -- Navigational Aid

NDB -- Non-Directional Beacon, a navigational aid to find airport

PAPI -- Precision Approach Path Indicator

Pave Pres -- Pavement Preservation

PH I-- Phase I of a multi-year contract

**REILS** -- Runway End identifier lights

SASP -- State Airport System Plan

**Set-aside --** A fund allocation for specific reason

**TVOR --** Terminal Very High Frequency Omnidirectional Navigation Aid

**VOR --** Variable Omnidirectional Range Navigation Aid

# Abbreviations

#### Counties

AP -- Apache

CH -- Cochise

CN -- Coconino

GI -- Gila

GH -- Graham

GE -- Greenlee

LA -- La Paz

MA -- Maricopa

MO -- Mohave

NA -- Navajo

PM -- Pima

PN -- Pinal

SC -- Santa Cruz

SW -- Statewide

YV -- Yavapai

YU -- Yuma

#### **General Terms**

AC -- Asphaltic Concrete

ACFC -- Asphaltic Concrete Finish Course

ACSC -- Asphaltic Concrete Surface Course

**APPR** -- Approaches

AR -- Asphaltic Rubber

AR/RE -- Asphaltic Rubber/or Recycle

AVE -- Avenue

ASP -- Arizona State Parks

**BLVD** -- Boulevard

EB -- Eastbound

FC -- Finishing Course

FMS -- Freeway Management System

IGA -- Intergovernmental Agreement

MP -- Milepost

**OP** -- Overpass

PCCP -- Portland Cement Concrete Paving

PE -- Preliminary Engineering

POE -- Port-of-Entry

**REHAB** -- Rehabilitation

**RPMS** -- Roadside Pavement Markers

RT -- Right

R/W -- Right-of-Way

SB -- Southbound

**STRS** -- Structures

SYS -- System

TI -- Traffic Interchange

TL -- Travel Lane

**up** -- Underpass

WB -- Westbound

#### Phase of Work

C -- Construction

D -- Design

G -- Geotechnical

L -- Location/Study

*X* -- Non-Construction

T -- Plan/Research

R -- Right-of-Way

## Regional Freeway

**CM** -- Congested Mitigation Air Quality Improvement

**DEMO --** Federal Demonstration Monies

**EX** -- Exchange of federal-aid for jurisdictional Arizona Highway User Revenue Fund (HURF) monies to be used on projects.

**FA/RARF** -- Federal Air and Regional Area Road Funds

FCDMC -- Flood Control District Maricopa Co.

RARF -- Regional Area Road Fund

SP 15% -- Special 15% (Urban Controlled Access)

STP -- Surface Transportation System

15% -- Urban Controlled Access
